

>> Hygiene concept Corona <<

We always follow the latest edition of the hygiene concept gastronomy of the Bavarian state government.

In addition, the sheer size of the hotel means that contact with other guests is kept to a minimum.

We have installed high-quality air cleaners in the breakfast room that handle twice the circulation volume as recommended by the Federal Environment Agency.

Also we have installed contactless hand disinfection dispensers in the breakfast room and in the hallway.

We wish you a wonderful stay, your Hotel Lux team
